

AMERICAN RED CROSS

Sept 26-18

Dear Dad ÷

Rec'd. today your letter of Aug. 19 was most tickled to death as I had not heard from the Old Boy for over three weeks. We have moved again since I last wrote and have just got settled down to business. The distance this trip was 45 mi and it rained all the while you can imagine what a fine time we had. We got a rush order for a field and putting in

all the day time & part
of the dark. Our Out fit
has made a very good
showing it is considered
the best aig of its kind
over here. None of our work
yet has failed to be
accepted and that is more
than the rest can say.
You buying the machine
in my estimation was a
very very good idea it
will do you & Mamma both
a world of good and you
must put in the time
running it now as the
woods will be getting
bad later on. I also suggest
you spend the winter

AMERICAN RED CROSS

in the south. you have
said nothing  lately of those
Bonds of mine and I suppose
you have never used them
but it seems to me you
should have as I finished
paying on them July 30th
the first time I have a chance
will send 100 to you as I
do not like to carry money
much. We have no YMCA
and there are none very
close and it is seldom I
ever get away. I thought
at Kelly Field ^{Texas} there were
a lot of planes but have
changed my mind as the
supply here is something
fierce.

through the silent tongue
Had I knew what Edith
named the boy before
I got your letter. It came
to me before I even knew
for sure they had one.

I bet they are troubled some,
and Emily I suppose is wild.

As to your weight, I read
an article some days ago
and the author said a man
should be no heavier at
70 than at 20 if he wishes
to live a long life.

My good health is still
A No!

So Long
